

DIN Rail Cutting

- Cutting of steel DIN rails - 35x7.5mm, 35x15mm, and 15x5mm geometries, aluminum DIN rails - 10x35mm geometry
- "Random" cuts - cuts to measured length without regards to slot location
- "Pattern" cuts - cut to measured length with specific alignment with slot locations. This allows for pre-drilling because the slot pattern is always the same. It also requires (2) cuts per piece and additional raw material.

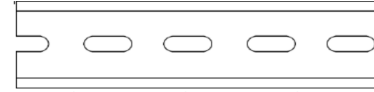

Length of cuts and requested cutting pattern must be supplied with order.

Applicable Part Numbers

DR3575ST-1	DR3575ST-2	DR3575-1	DR3575-2
DR3515ST-1	DR3515ST-2	DR3515-1	DR3515-2
DR155ST-1	DR155ST-2	DR3575AL-1	DR3575AL-2

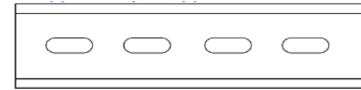

Random Cutting

Only (1) cut is required.

Pattern Cutting

(2) cuts required, (1) for each end.

DIN Rail Cutting Price Schedule

Number of Cuts	Price Per Cut
20-50	\$0.75
50-100	\$0.60
100+	\$0.40

Wiring Duct Cutting

- All cuts are made in the slots only.
- Cuts are made to the requested length, shorter to the previous slot.
- Mounting hole locations are random unless specified otherwise. Patterned mounting hole locations requires extra material and extra cuts.
- Covers are cut to the requested length.
